National Equine Database

## What is NED?

NED is the National Equine Database which contains details of every horse, pony and donkey in the UK with a UK passport, as well as an increasing number of horses born overseas. The information NED can show you includes the horse's name, age, height, colour, gender and breed/type.

## Is that all?

Many Passport Issuing Organisations also supply information on a horse's pedigree which, when added to competition results supplied by British Eventing, British Showjumping, British Dressage and Endurance GB, starts to build the most complete picture of each horse's heritage and ability.

And, if you have some equine sporting favourites - you can track their results in NED. Just pop the horses you'd like to follow into your "favourites" box and you can plot their successes over the season.

## What's in NED for me as a horse owner?

You can associate with your horse(s) in NED. This allows you to "claim" them online and add additional information - such as a photograph and detailed description. Importantly, if your horse is unfortunate enough to be lost or stolen (it does happen), you can mark this on NED's Lost & Stolen Register which will increase the chances of him/her being returned to you and reduce the chances of them being sold on. NED can give you peace of mind that, in conjunction with a microchip or freezemark, or both, you have done your best to protect your horse.

You can also set reminders for important dates such as dental checks, vaccinations or worming due dates.

## Buying or selling a horse?

As a buyer you can save wasted journeys to view horses that don't turn out to be what they promise. Run a NED Passport Check first to be sure that this horse does have a passport and that the other details you have been supplied with are accurate before you drive a long way to view your new best friend. As a seller, you can buy a NEDLink to the horse you have for sale and give prospective buyers the opportunity to view your horse's details free on NED.
